

DAS Fleet's Environmental Management System Objectives and Targets

DAS Fleet has established and maintains objectives, with measurable targets. Setting objectives and targets makes us accountable to our environmental policy and our commitment to continual improvements in environmental performance.

Objective

Target

Reduce Greenhouse Gas & Smog Emissions

No increase in vehicle emissions using the year 2006 baseline, thru 2010.
Reduce to 10% below 2006 levels by 2020.
Reduce to 75% below 2006 levels by 2050.

Alternative Fuels

Increase awareness and usage of alternative fuels. Promote alternative fuels to state and local government agencies.

Energy Reduction

A 10% reduction in electricity and natural gas from the year 2000 baseline.
A 20% energy reduction by the year 2015.

Natural Resource Conservation

100% renewable electric power by the year 2025.

Water Conservation

Maintain current water usage at motor pool from the year 2000 baseline.

Waste Reduction

Continue current recycling efforts within Fleet, with an emphasis on communication and ongoing training of employees and customers.
